EXECUTIVE SUMMARY

A full physical and logical extraction of Exhibit EVI-2026-98102-IP was authorized under Search Warrant #SW-2026-0911. Hardware exploitation bypassed the device passcode without data zeroization. Analysis revealed active encrypted messaging channels (WhatsApp, Signal, Telegram), wiped SQLite WAL files recovered via unallocated space carving, and critical location artifacts placing the device at key points of interest.

OFFICIAL EXAMINER DECLARATION & LEGAL ATTESTATION

I hereby certify under penalty of perjury that the digital evidence extraction and analysis performed on Exhibit EVI-2026-98102-IP was executed in compliance with ISO/IEC 27037 standards for digital evidence handling. The cryptographic hashes generated immediately upon acquisition match the post-analysis verification digests, confirming that no data alteration or tampering occurred during extraction or reporting.
